

Cutting-Edge Digital Infrastructure

Paris Region's economy relies on its strong digital ecosystem to cater to the needs of many industries. The Fiber to the Home Infrastructure currently covers almost 100% of the Region, making the system available to everyone in the Region regardless of whether they live in a dense urban environment or rural areas. The Region has a dense data center and telecom infrastructure, making it the 4th densest region in this sector in Europe for these types of uses.

A Smart and Connected Region

Launched in February 2013, the High-Speed Broadband France Plan aims to cover the entire country by 2022 by proposing high-speed internet access to all houses, businesses and government departments.

Paris Region aims to be the first region in Europe to be entirely equipped with fiber-optic cables by 2020/2025.

Reliable Telecommunications and Networks
