

One of the Most Fiber-Connected Regions in Europe

Paris Region's economy relies on its strong digital ecosystem to cater to the needs of many industries.

The Region is the connection point for all existing Internet networks in France.

The Fiber-to-Home Infrastructure currently covers almost 100% of the Region, making the system available to everyone regardless of whether they live in a dense urban environment or rural areas.

The Region has a dense data center and telecom infrastructure, making it the 4th densest region in this sector in Europe.

A Smart and Connected Region

Launched in February 2013, the High-Speed Broadband France Plan aims to cover the entire country by 2022 by proposing high-speed internet access to all houses, businesses and government departments.

Paris Region aims to be the first region in Europe to be entirely equipped with fiber-optic cables by 2025.

Reliable Telecommunications and Networks

4G Mobile Telephony

- 4 operators (Orange, Bouygues Telecom, SFR, and Free)
- 99.8% of the population is covered
- 100% coverage in the Paris metro (tunnels and stations)

5G Mobile Telephony

- The 4 operators have deployed their networks in the metropolitan area.
- Nearly 90% of the sites equipped with 5G offer very high speed mobile broadband (theoretical speed 240 Mbit/s).
