Cutting-edge digital infrastructure

The Fiber to the Home Infrastructure currently covers almost 100% of the Region, making the system available to everyone in the Region regardless of if they live in a dense urban environment or rural areas. The Region has a dense data center and telecom infrastructure, making it the 4th densest region in this sector in Europe for these types of uses.

A smart and connected region

Launched in February 2013, the High-Speed Broadband France Plan aims to cover the entire country by 2022, by proposing high-speed internet access to all houses, businesses and government departments.

The Paris Region aims to be the first region in Europe to be entirely equipped with fiber-optic cables by 2020/2025.

Reliable telecommunications and networks

4G Mobile telephony
- 4 operators
- 99.8% of the population is covered
